Forward-thinking SEO strategist with 15+ years of experience transforming organic search performance across diverse industries. Proven track record of building high-performing content teams, developing innovative AI-enhanced workflows, and driving measurable business outcomes. Expertise spans technical SEO, content strategy, and cross-functional leadership with a journalist's eye for quality and a data analyst's precision for results.

Experience:

Razor Rank: Director of SEO Content August 2022 — March 2025

- Spearheaded the establishment of a dedicated SEO content program division, designing and creating scalable workflows that increased production and reduced time from ideation to execution.
- Developed and executed a framework for journalistic-style content that increased client expert visibility, resulting in higher engagement metrics and improved E-E-A-T signals.
- Pioneered AI implementation across content operations that reduced research time significantly and increased writer productivity greatly while maintaining the brand voice clients expected.
- Led cross-functional initiatives between SEO, content, and web development teams.
- Assisted the sales team with audits and demonstrated content strategy excellence.

IMPACT: Director of SEO April 2021 — August 2022

- Led all organic search strategy and execution for IMPACT.
- Developed and implemented an AI-enhanced content workflow system that reduced production time.
- Collaborated with web development teams to address technical SEO barriers
- Worked alongside website strategists and trainers to integrate "They Ask You Answer" inbound marketing principles into SEO strategies for key clients.
- Regularly hosted training sessions for clients and team members and recorded a video series on technical SEO for the content marketer for IMPACT Plus subscribers.

Swappa: SEO Manager January 2020 — March 2021

- Led organic search strategy for Swappa's human-centric ecommerce marketplace, directly managing all SEO initiatives and a dedicated content team of three writers.
- Developed and executed a content calendar focused on high-value product information and in-depth category guides that expanded Swappa's topical authority in the secondary device market.
- Created weekly performance reporting frameworks that tracked organic traffic growth, position changes, and conversions, providing actionable insights to the executive team.
- Collaborated with development teams to address technical SEO barriers, prioritizing improvements that had the greatest impact on site performance and user experience.

Namecheap: Senior SEO Content Manager **July 2017 — July 2019**

- Led a remote team of four content specialists creating strategic content across multiple product lines, establishing Namecheap as an authority in domains and web services.
- Developed comprehensive content silos and a resource center that addressed customer pain points, substantially increasing organic visibility for key product terms.
- Implemented a data-driven content strategy that aligned with user search behavior, resulting in improved engagement metrics and conversion rates across product pages.
- Created detailed weekly performance reports connecting content initiatives directly to product sales, providing clear ROI metrics to executive leadership.
- Collaborated with product managers to identify customer search patterns, contributing valuable market intelligence that informed new product development.
- Established content guidelines and brand voice documentation that ensured consistency across multiple product categories and writer teams.
- Conducted regular content audits to identify optimization opportunities, leading to significant improvements in existing content performance.

Vistaprint: Senior Organic Search Specialist **May 2015 — June 2017**

- Conceptualized and launched a comprehensive small business resource center that established Vistaprint as a thought leader while expanding organic visibility for key product categories.
- Developed actionable KPI reporting frameworks that tied content performance directly to business objectives, enabling data-driven optimization decisions.
- Conducted extensive keyword research and market analysis that informed product development teams about emerging customer needs and competitive opportunities.
- Fostered cross-functional collaboration between marketing, product, and development teams, breaking down silos to ensure cohesive implementation of SEO initiatives.
- Implemented Agile methodology for content projects, increasing team efficiency and improving responsiveness to market changes and algorithm updates.
- Created content strategy playbooks that were adopted company-wide, establishing consistent SEO best practices across multiple departments and teams.
- Led content SEO audits that identified critical improvement opportunities, resulting in substantial gains in organic traffic to high-value conversion pages.
